AWARDS AND KEY ACHIEVEMENTS

Played a key role in fixing major production issues on time.

Bestowed with the "**On the Spot Award**" twice for Client appreciation on Production issue fix and delivering the working model on time.

EDUCATION

Sri Sairam Engineering College, Chennai, India— *Bachelor of Information Technology*

August 2011 - May 2015

SRDF Vivekananda Vidyalaya, Chennai, India— *Higher Secondary Certificate (HSC)*

April 2011

SRDF Vivekananda Vidyalaya, Chennai, India— *Secondary School Leaving Certificate (SSLC)*

April 2009

PROJECTS

PROJECT 1: Toolbox horizon

Client: Boeing

Brief: Central content repository for maintenance and engineering support artifacts (manuals) used by Airline customers for aircraft maintenance activities in online and offline mode.

- Created a new Angular component to display a graphic model of the airplane as part of requirement.
- Actively involved in production issue fix and maintenance.

PROJECT 2: Christmas Food to Deliver

Client: Marks and Spencer

Brief: Module to monitor and make changes to the web page design which allows users to purchase goods during Christmas and New Year.

- Created a new Angular component to display search box as part of requirement.
- Gained experience in agile methodologies and JIRA boards as a part of scrum team.
- Involved in sprint retrospectives to discuss 'What went well' and 'What can be improved'.

LANGUAGES

Tamil, English, German language – Elementary Language Proficiency (A1)

PROJECT 3: Closure Orchestration Portal

Client: Bank of America

Brief: Maintaining a central database to take ownership and ensure all products and services of client relationship designated for closure are appropriately closed.

- Built formly-form module of angular as per client requirements with directives to support JSON configured forms.
- Deployed project in both lower and higher level environments.
- Tested and supported legacy applications in case of production issues by having clear communication with clients.
